

Streak Free

DISH MACHINE RINSE ADDITIVE

FOOD SERVICE PRODUCTS

DESCRIPTION: PRIDE'S STREAK FREE is a concentrated hard water rinse additive designed for use where hard water is a problem. Its blend of acids and wetting agents combine to allow peak efficiency of any warewash equipment. STREAK FREE prevents spotting and streaking while inhibited to prevent damage to dispensing equipment. Proper use will prevent build-up of lime scale.

DIRECTIONS:

- STREAK FREE should be used at the lowest setting possible to achieve desired results.
- Proper determination of water hardness for use area is critical for product to work efficiently. As a general rule, 2 – 4 ounces per 10 gallons of water.
- Rinse water should be maintained at 180° F. Water must be hot for drying agent to work properly.
- Dispensing pump should be regularly maintained and checked for proper rate of delivery. Dispensing tube should be clear of obstructions.
- Concentration will depend on water hardness, water solids, detergent used (we recommend PRIDE'S DISH SCRUB or CHLORINATED DISH SCRUB for best results), and rinse arm pressure.
