

Solid Laundry Break

SOLID DETERGENT BLOCK

LAUNDRY PRODUCTS

DESCRIPTION: PRIDE'S **Solid Laundry Break** is a blend of heavy-duty alkaline builders and sequestering and soil suspending agents. **Solid Laundry Break** supplies additional power to release even the most difficult soil and grease stains. Once released from the fabric, the soil suspending agents prevent the soil from redepositing on the fabric. It may be used alone in a cycle or in conjunction with **Solid One Shot**. It is specially formulated to be completely compatible with all other laundry products. **Do Not Use On Natural Silk Or Wool.**

DIRECTIONS:

Solid Laundry Break is specially formulated to be used with **Solid One Shot** or with **Solid Oxy Bleach** for a personally tailored laundry operation. It is formulated to be dispensed directly from the container, thereby eliminating handling and possible spillage.

- For Normal Soil: Use 2 to 4 ounces per one hundred pounds of work.
- Optimum soil release and stain removal will result at any temperature from 140°F to 160°F.
- Effective soil removal at the concentrations and temperatures given may be obtained during a normal 4 to 8 minute wash cycle. If extreme conditions exist, a longer, or repeat cycle may be necessary.
- Should not be used where solution contact with aluminum will be made.
